EDUCATION

Lovely Professional University 2025 – 2027 (Pursuing)
Master of Computer Applications (MCA)

Patliputra University 2022 – 2025
Bachelor of Science (B.Sc.) – Information Technology

EXPERIENCE

Full Stack Developer Aug 2024 – Present
Sanjivani Media and Technology (Web Development Intern: Aug 2024 – Mar 2025; Full-Time: Mar 2025 – Present)

- Design, develop and test production web applications using **C#**, **ASP.NET** and **MySQL**, implementing backend business logic, database operations and **REST API** integrations.
- Build responsive user interfaces using **HTML, CSS, JavaScript** and **Bootstrap**; participate in requirement discussions and translate business needs into backend-integrated, database-driven features.
- Implemented **authentication**, **authorization** and employee/attendance management workflows, including **device-based authentication**, following security best practices.
- Optimized **SQL queries** and application logic to improve performance and scalability.
- Debugged and resolved production issues across frontend, backend and database layers; supported testing, deployment and post-release troubleshooting while collaborating with the team on feature delivery.

PROJECTS

Atheleos — Sports Social Platform *(Website Live · App in Testing Phase)*
Website | App | Admin *Flutter, Firebase, Firestore, Cloudflare R2, TypeScript, React*

- Built a complete sports social platform for athletes, coaches, scouts and brands — **website published live at atheleos.in**; the mobile app is currently in **testing phase**.
- **Mobile App (Flutter):** posts and short-form clips, 24-hour stories, real-time chat, events and athlete profiles, using Firebase Auth/Firestore, Cloud Functions (Node.js), Cloudflare R2 media storage and FCM push notifications.
- **Admin Panel (React, TypeScript, Express):** full moderation and management console with ~80 API endpoints across 18 sections — user/content moderation, reports & appeals, verification queue, analytics, role-based access and audit logs.

HR Management System
Play Store *ASP.NET, C#, MySQL, Bootstrap 5, REST APIs*

- Developed a production HR management system (web and mobile) published on the **Google Play Store** with **5,000+ downloads**.
- **Employee Management & Records:** centralized employee profiles and records with database-backed storage, secure access and easy retrieval.
- **Attendance:** geo-fenced attendance with device-based authentication and Break In/Out tracking with automated time calculation; reduced proxy attendance through location and device validation.
- **Leave & Late Management:** built workflows for leave requests and late-arrival tracking linked to attendance data.
- **Payroll & Reporting:** payroll processing driven by attendance, leave and late records; generated attendance, leave and payroll reports for HR and management review.
- **Admin Functionality:** admin panel to manage employees, attendance, leave and payroll, supported by authentication and authorization controls.

AI Voice Calling Platform (Open-Source)
GitHub *Python, FastAPI, WebSockets, React, PostgreSQL, Redis, Docker, Ollama, faster-whisper*

- Built a real-time AI voice agent: browser microphone to a pipeline of voice activity detection, **speech-to-text**, **LLM** and **text-to-speech**, using only open-source models running locally; supports English and Hindi.
- Developed an async **FastAPI** backend with **JWT** authentication, a **WebSocket** call protocol with barge-in, per-agent tool calling, a **RAG** knowledge base over uploaded documents, and call transcript and latency storage in **PostgreSQL**.
- Created a **React** dashboard, wrote **23 pytest tests** and added **Docker Compose** deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, SQL, Java, Python (basic), Dart, HTML5, CSS3
Database: MySQL, PostgreSQL, Firestore, SQL Queries, Query Optimization, Database Design
Backend: Node.js (Express), ASP.NET, C#, FastAPI, REST APIs, WebSockets, Authentication & Authorization
Frontend & Mobile: React.js, Tailwind CSS, Bootstrap 5, HTML5, CSS3, Flutter, Android Development
Tools & Platforms: Git, GitHub, Docker, Visual Studio, Google Play Store, Firebase, Cloudflare
Core Concepts: OOP, DBMS, Software Testing, Debugging, Documentation
